DETAILED ACTION

Allowable Subject Matter

1. Claims 14-28 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose a host system configured to request for file system objects stored by a storage device by identifying the block addresses containing a requested file system object; the host system further configured to identify the file system object to the storage device if the requested file system object comprises secure content. As noted by Applicant on pg. 8 of the Remarks, filed on 5/1/08, "although [this storage device] responds to block level requests for content, the storage device also had knowledge of the file system used by the host such that the storage device can identify the necessary meta data corresponding to the stored content." Hence, claims 14-22 are allowed.
3. The prior art of record does not disclose a host system configured to request for non-secure file system objects by identifying the block addresses corresponding to the non-secure file system object and to request for secure file system objects by identifying the file system object, wherein the storage device having the secure and non-secure file system objects includes a storage engine, which is configured to respond to block-level requests for non-secure files by translating the block-level requests from the host system to byte-level offsets within a file system object; and to control the file system associated with secure file system objects by determining where secure file system objects will be stored on the storage medium and where the corresponding security metadata will be stored on the storage medium. As noted by Applicant on pg. 10 of the

Remarks, filed on 5/1/08, "Kitamura [does not disclose] the hybrid system of claim 23 (in which the host accesses non-secure file system objects through block level requests and accesses secure file system objects by identifying the file system object and in which the storage engine performs the translation for the block level requests and then controls the manner in which secure file system objects and their security meta-data will be stored)." Hence, claims 23-28 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
